

## Environmental policy Oasis Lodges Marrakech

Human activity is a source of environmental damage. Industry, services and all economic activities leave a negative environmental footprint when it comes to high consumption of resources, disregard of good practices and production of waste.

Companies in the tourism sector and given the intense activity of the sector, 1.400 billion tourists in 2019, are trying to put in place strategies to contribute to the respect of the environment and the integration of the principles of sustainable development.

The hotel residence, Oasis Lodges, located on the road to Amizmiz Marrakech, classified in 1st category, according to Moroccan standards, is committed to minimizing its ecological footprint by conducting its activities in the most sustainable way possible.

This policy/strategy will be made known to all stakeholders: owners, employees, guests, suppliers and public authorities, so that everyone is aware of the environmental policy pursued by our establishment, while allowing them to actively contribute to the environmental objectives we have set.

For the logic of this policy, we are committed to a labelling process in partnership with the Foundation for Environmental Education (FEE) in order to obtain the international Ecolabel "Green Key" which rewards hotel structures that respect the environment.

In this regard, Oasis Lodges fully subscribes to all the requirements, objectives and statements advocated by the green key consisting of controlling, preventing and limiting waste flows, water consumption and energy consumption and preservation of ecosystems.

Our policy aims to position Oasis Lodges-Marrakech as an 'environment friend' accommodation establishment through its involvement in environmental management in a conscious manner. In particular, by respecting the legislation of Morocco, social responsibility and respecting the criteria of the ecolabel - "green key".

The general manager, fully committed to this process, will ensure the responsibility of environmental management through the requirements of the ecolabel. She will take all possible measures to ensure continuous improvement.

To end, Oasis Lodges supports the development of an environmental culture within the company, ensuring that owners, management, employees and guests are aware of the potential environmental effects of the establishment's activities and the benefits of improved environmental performance.

This policy is reviewed annually to ensure that it remains applicable to the residence's activities and respects the criteria and requirements of the Green Key ecological label.

Manager
